

# FLEXIGERM. INSTRUCTIONS

**Seed Starter (Pty) Ltd.**

**How to use your FlexiGerm. Remove your FlexiGerm. lid by pulling up one of the corners (bottom left and top right have no magnet to assist the ease of opening).**

**You can use FlexiGerm. with or without germination pads.**

**Place a germination pad in each desired pod and place your seeds on the pad.**

**Add 5ml of your preferred germination solution (FlexiGerm. is safe to use with hydrogen peroxide, humic and fulvic acids etc).**

**Place another pad on top and add another 5ml of germination solution.**

**Place the lid on top, locking the magnets in 2 of the corners.**

**Place FlexiGerm. on a heat mat or SAFE warm surface at the temperature of your choosing based on the type of seeds you are germinating. If using a thermostat, set your heat mat approximately 3 degree Celsius higher than the intended pod temperature. Don't let the pads dry out.**

**Once a tap root is formed, place in the growing medium of your choosing.**

**To clean FlexiGerm. , wash with warm soapy water (rinsing and drying thoroughly) or wipe down with hydrogen peroxide. FlexiGerm. is also dishwasher safe (on a higher level away from the heating elements for the drying cycle).**

**The magnets in FlexiGerm. are attached with industry standard primer and superglue. Avoid pooling solvents like rubbing alcohol on the magnets. If over time a magnet pops out, use any quality super glue for an instant fix.**
